Project Description

The Kantonsspital Winterthur (KSW) is one of the largest hospitals in Switzerland: around 240,000 patients are treated there every year, 27,000 of them as inpatients. The hospital in the canton of Zurich thus not only ensures basic care in Winterthurn and the surrounding area, but also attracts patients from surrounding regions due to its specialisation in many areas. In addition to excellent medical competence, the KSW offers state-of-the-art technical equipment as well as elegant surroundings in which patients, visitors and employees should feel comfortable. Numerous Lindner products were installed in the hospital: Here, glass acted as a central design element in the interior design. The transparent Lindner Life glass partitions as well as the custom-made sliding windows also allow for discretion if desired thanks to electric and manual blinds. The visual highlight of the hospital are the "artist walls" – glass walls decorated with sandblasted works of art. The installed planum glazings with foil coverings are not only visually impressive, but also offer excellent fire, sound and radiation protection. The numerous glass elements in the clinic are countered by metal wall claddings and wooden door elements.

General

Building Type	Clinics and Hospitals, Public and institutional buildings
Company Division	Lindner SE Arnstorf | Branch Opfikon
Completition	2020 - 2021
Architect	Rapp Architekten
Client	Hochbauamt Zürich

Completed Works

- **Partitions**
