Description du projet

Together with the Benedictine Abbey of St. Gertud, the Hans Lindner Foundation has designed another multi-generation house for children and senior citizens – the Parkwohnstift Tettenweis. In the course of the complete renovation of the 38,000 m^2 building, Lindner was involved in the construction project with numerous finishing services and products such as wooden doors, parquet flooring and underfloor heating.

In addition to the renovation work, three new bungalows were built. Today, in the former building of the sisters' community there are apartments for assisted living, an outpatient care service, a day care centre for children and a day care centre.

A particular challenge in the construction process was the fire and monument protection in the existing building: The Lindner NORIT products provide a remedy here – they can be used in new as well as existing buildings without any problems.

Therefore, the multi-generation house contains several thousand m^2 of the NORIT dry screed: This is particularly environmentally friendly due to its gypsum fibre component. In addition, 90,000 kg of NORIT's bonded fill provide stability: The dry fill creates a levelling effect in the floors and thus ensures barrier-free accessibility in the building. Modern comfort and a feel-good atmosphere are guaranteed by more than 800 m2 of NORIT underfloor heating: The panel heating and cooling systems are integrated directly into the floor and ensure a pleasant indoor climate.

Généralités

Type de bâtiment	Bâtiment résidentiel
Division	Lindner Gipsfaser- und Trockenbau
Réalisation	2020 - 2021
Client	Hans Lindner Stiftung

Exécution des travaux

- **Chauffage par le sol NORIT**
  NORIT-TE 30 Therm GF
- **Chape sèche NORIT**
  NORIT-TE 20
