

Fresenius EK3 Bad Homburg

Bad Homburg, Germany

Project Description

The steadily increasing number of employees caused Fresenius health care group to build a five-storey new constructoin at the group headquarters in Bad Homburg. The energy-efficient "EK3" offers 600 modern office workstations as well as conference rooms, an additional company restaurant and an underground carpark. Lindner was responsible for a considerable part of the interior fit-out works in the EK3. In addition to the central control of trades, Lindner was also able to contribute its own products, including post-cap ceilings with and without heating and cooling functions as well as floor systems and wooden doors, some with fire protection requirements.
