Metal Ceilings from Lindner

Lindner

Building New Solutions

Building new solutions.

Lindner undertakes major worldwide projects in all areas of interior finishes, insulation technology, industrial services and building facades. From pre-planning through to project completion Lindner is your partner of choice.

The Company's extensive manufacturing capability enables quality to be strictly maintained whilst allowing maximum flexibility to meet individual project requirements.

Environmental considerations are fundamental to all Lindner's business principles.

Through partnerships with clients Lindner turns concepts into reality.

Choosing Lindner you have:

Lindner Concepts:
Tailored solutions specifically geared to satisfy individual project requirements

Lindner Products:
Quality materials and systems to the very highest industry standards

Lindner Service:
Comprehensive project management services

New horizons for your space!

Discover our unique range.

Focus on individuality:

- We provide everything from one source
- Tested to the highest quality standards
- We can install customised ceilings at any time
- With different surfaces and finishes
- Our systems meet the highest sound and fire protection standards

Main Tower, Frankfurt am Main

The perfect finish. Lindner metal ceiling systems.

No matter what demands will be required from your ceiling we can find the perfect solution. For functionality as well as style; from concealed to fully accessible and swing-down ceilings. We will find the perfect solution not only for all internal and external areas but also for customised designs in underground train stations, airports and many other specialist projects. Construct your building just the way you want. Discover our wide range of ceiling systems.

For the highest standards. Lindner quality.

Highest product quality goes without saying. We produce metal ceilings to the highest international standards resulting in a product life expectancy of up to 30 years. Our systems comply with the requirements of DIN EN 13 964, ASTM C 635 and BS 8290 parts 1-3.

The right solution for every idea:

- Post Cap ceilings
- Hook-On and Corridor systems
- Cassette ceilings
- Expanded Metal ceilings
- Honeycomb and Baffle ceilings
- Strip Panel ceilings
- Torsion Spring
- Canopy ceilings
- Sports Centre ceilings
- Fireproof ceilings
- Customised ceilings

Maximum opportunity for design. Lindner surfaces.

Simply design a ceiling to suit your requirements and we will deliver the complete solution from one source. In conjunction with Lindner Lighting Systems and other components we can supply you with a perfectly coordinated product. All systems are available with a variety of perforations and decorative features. As well as standard surfaces we can also supply customised surfaces and colours. Our finishes are suitable for both internal and external applications as well as for both fire resistant and chilled ceilings. Just the way you want.

We do more than just finish our products.

We produce your metal ceiling with:

- Powder coating
- Coil-Coating surface
- ARTline/STYLEline/GRAPHICline decorative finish
- PUREline genuine wood veneer
- AntiGraffiti finish
- AntiBac finish
- METEO corrosion protection finish
- Mutex absorbent finish
- Almost any other desired customised finish

Volksbank Raiffeisenbank, Dachau

To give your rooms a natural feel, we supply our metal ceilings in a variety of decorative wood finishes. Our ARTline wood surface with a special powder coating is shown above. The surface is highly resistant to UV rays as well as solvents and chemicals.

Bosch, Karlsruhe

A large selection of perforation patterns with a variety of shapes, sizes and spacings. Of course we can also produce customised perforations when required.

The foundation for flexible rooms. Lindner Post Cap ceilings.

This flexible system enables you to partition any room in any building in a visually pleasing way. Whether you require variable spacing between the post caps or ceiling panels of different sizes, Post Cap ceiling systems meet your design requirements. The panels are fully accessible to facilitate maintenance work.

Lindner Post Cap ceilings lay the foundations for a flexible room layout, as well as offering you a wide choice of surfaces and perforations. Accentuate the individuality of your space with Lindner Lighting Systems.

Options for customised projects:

- Linear Post Cap
- Post Cap with Cross Noggins
- Post Cap with Crossing Boxes
- Swing-Down function
- Drop-Slide function
- Heated or Chilled ceilings

Biocenter, Copenhagen

Variety is our top priority. Lindner Hook-On ceilings.

You can expect aesthetically pleasing, high performance solutions from our products. The Hook-On system allows maximum space for design – in rooms as well as in corridors.

The Hook-On system offers impressive benefits: ease of installation and demountability offering full accessibility, and available in our patented Drop-Slide option.

The finished effect is monolithic. With a range of panel sizes, perforation patterns and surfaces this is variety at its best.

Campeon, Munich

With a high degree of flexibility our Hook-On ceilings can tackle almost all project demands.

Woonzorg, Nederland

Photo: Lemke Ruige

**Nothing is too much for this ceiling.
See for yourself:**

- Excellent visual appearance with flush ceiling to partition connection
- A variety of ceiling panel shapes to suit your space (e.g. trapezoidal or triangular ceiling panels)
- A range of connections
- Fold Down and removable ceiling panels allow flexibility and easy access
- Suspended, concealed T-Profile construction
- Design-friendly thanks to a choice of modules

**Different systems
for corridors and rooms:**

- Lay-In option
- Hook-On option
- Hook-On-and-Swing-Down option
- Fold-Down-and-Slide option
- Drop-Slide mechanism
- Also available as heated or chilled ceilings

Classic Elegance. Lindner Cassette ceilings.

We have improved our classic ceilings over the years to fulfil the needs of construction projects all over the world. The key features of this innovative system are its high level of flexibility and the ease with which it can be adapted. For optimal acoustics in your building our Cassette ceilings meet a wide range of sound control criteria. Impressive surfaces and unique perforations lend your rooms an individual feel. Experience noticeable quality.

Numerous possibilities are waiting for you:

- Lay-In option
- Clip-In option
- Clip-In-Fold-Down mechanism
- Hook-On option
- Available with longitudinal sound reduction
- Available with heating and cooling functions
- Wide range of designs

Commerzbank branch, Székesfehérvár, Hungary

Affordable at all times. Lindner Torsion Spring.

The system is made up of a lightweight, easy to handle and hidden substructure.

This affordable ceiling can be opened and folded down quickly and easily, allowing for easy access even after installation.

Proven simplicity – flexible innovation:

- Reliable, easy-to-install substructure
- Particularly easy to adapt
- Different panel lengths available
- Ceiling panels are fitted with pivot-mounted spring-loaded hooks on the long sides

The clever integration of the panels with the substructure enables unique functionality. Each ceiling panel can be swung down along the T-Profile in either direction to give you the necessary space for maintenance work.

An impressive look for any room. Lindner Expanded Metal ceilings.

Combine function with design for an attractive finish:

Create a unique look with our Expanded Metal ceilings and their range of surface finishes.

Whether diamond-shaped or square mesh, or an open cell or a closed panel system, our large range of mesh designs enables you to create a uniquely individual room.

De @rchipel Bredeschool, Almeren

Scoring points in sports centres:

Our range of impact resistant ceilings are characterised by their extremely high level of resilience.

Attractive options:

- Hook-On option
- Lay-In option
- Aluminium frames
- Fold-Down option
- Drop-Slide function
- Available as Post Cap with Cross Noggins

With our unique range of Expanded Metal ceilings you can create an unrivalled ambience for your buildings - our large range of mesh designs offers the right solution for all projects.

**The specialist
for all areas of
application.
Lindner Baffle ceilings.**

Fiducia, Karlsruhe

This ceiling creates an impressive look in every room.

Thanks to its various installation possibilities, this system gives your creative energies free rein. The Baffle ceiling LMD-L also proves itself in terms of acoustic absorption and can be easily integrated with heating and cooling technology, giving your rooms a remarkable feel.

Variable spacing and flexibility in the height of the baffles provides you with enough space to easily install lighting, sprinklers or air-conditioning.

Our extensive knowledge, decades of experience and personal support enable your project to be carried out with special individual solutions just the way you want.

Volksbank Raiffeisenbank, Dachau

The sky's the limit. For your ideas.

- A range of materials
- Different linear modular systems available
- Open ceiling cavity for air flow
- Also available with an inlaid metal ceiling panel for a stylish finish

Lufthansa First Class Lounge, Frankfurt
Design: Hollin + Radoske Architects

Reaches the high point in large buildings. Lindner Strip Panel ceilings.

Only our best is good enough to satisfy your needs.

For years our Strip Panel ceilings have set decisive trends in many buildings and today still provide the perfect solution for challenging projects. Whether in swimming pools or sports centres, the system finds its niche where other ceilings have proved to be inadequate.

In combination with our own heating and cooling technology you can ensure a perfect temperature for all large buildings. There are a variety of options to satisfy your creativity:

We produce the Strip Panel ceiling with plain or perforated surfaces, in different colours and in various widths.

Fill concert halls with our solutions:

- Simple, affordable system
- Monolithic or exposed grid system
- Aluminium or steel base material
- With either a perforated or plain surface

Water Park, Grünstadt

Inner beauty. Lindner Canopy ceilings.

Discover the uniqueness of this system – design your rooms with the best in visual finish.

Terminal 5, Heathrow Airport, London

Combine function with design with our tailor-made Canopy ceilings LMD-DS. All systems can easily integrate lighting, loud-speakers and sprinklers - individually coordinated to match your project.

Heaven sent projects:

- Enhanced acoustics
- Variety of sizes
- Available as heated or chilled ceilings
- Ideal for installation either singly or in rows (as shown in the photograph on the left)
- Large selection of perforations

Secret talents:

- Concave shaped
- Convex shaped
- Frame surround
- Curved edge
- Chamfered edge

Eyes up. Lindner Customised ceilings.

The individuality of your projects is a positive challenge for us and one that we particularly look forward to.

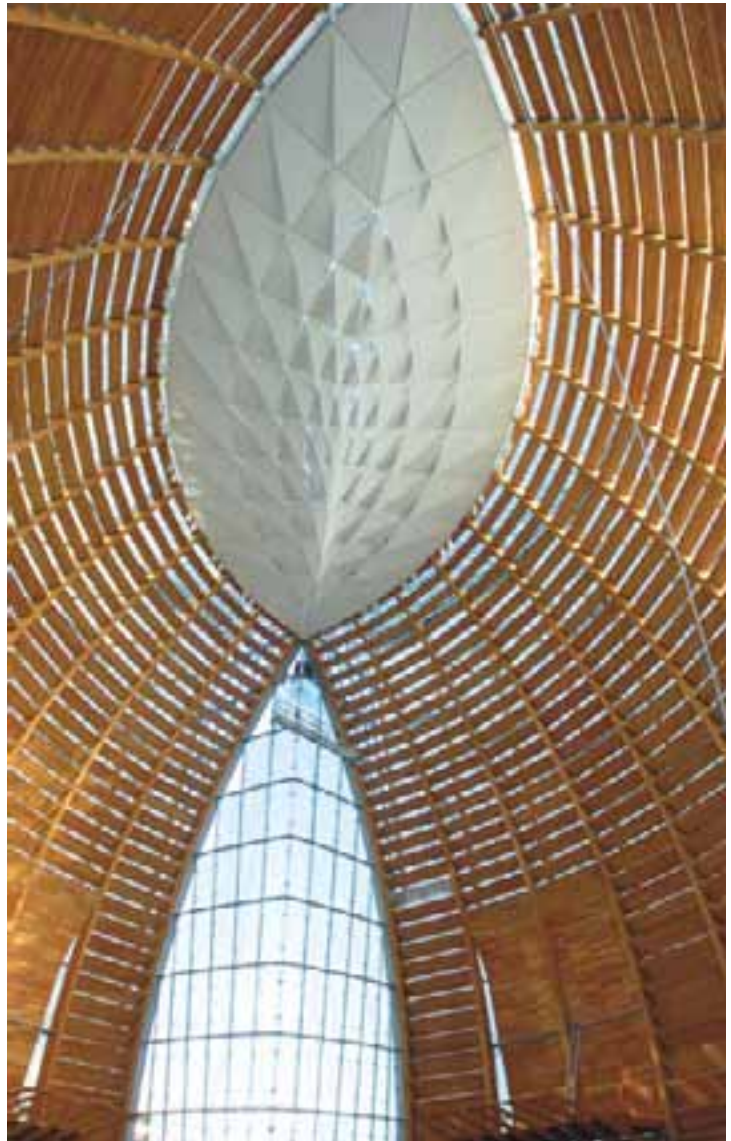

No matter how unique your concept might be we are your partner of choice for integrated, customised solutions that can satisfy all sound protection and fire regulation requirements. Beginning with your concept, taking it through the planning stage to the final stages of installation, we are more than happy to help you.

We develop tailor-made ceilings and produce unique designs such as trapezoidal, triangular or disc ceiling panels in a range of surfaces and materials – made to fit your rooms and your buildings.

Madrid Barajas International Airport
Architects: Rogers Stirk Harbour + Partners, Estudio Lamela

Cathedral of Christ the Light, Oakland

Would you like to complete the uniqueness of your ceiling by integrating coordinating lighting solutions?

We can offer our portfolio of lighting systems with an abundance of options – precisely tailored to meet your design. See for yourself – experience maximum flexibility as only we know it.

So the roof won't cave in on you. Lindner Fireproof ceilings.

Our fire protection systems LMD F30/F90 fulfil the highest visual standards and can withstand extreme conditions.

University of Hohenheim, Stuttgart

These tried and tested systems are, as you would expect from Lindner, fully developed and are extremely user friendly.

University of Karlsruhe

Form follows function. And vice versa.

Our fireproof solutions also meet unusual design specifications, thanks to a range of ceiling finishes, dimensions and customised options.

In addition other surfaces are available to give your corridors and rooms a tasteful finish. Ultimately customised fire protection solutions are our forte.

All options are safe with us:

- Lay-In option
- Hook-On option
- Fold-Down option
- Innovative Drop-Slide ceiling
- Integration of heating and cooling technology

We feel at home with your projects. Lindner Service.

For integrated solutions from one source, we are your partner of choice with the benefit of years of experience in all areas of the interior fit-out industry. In addition to this we provide a professional **service** at every stage of your project.

In all areas of our business there is just one aim: your project. It goes without saying that our exclusive, long-term partner network can guarantee large numbers of specialist craftsmen for your project. Therefore we can provide extensive manufacturing capabilities, short delivery times and efficient installation of your products.

Solutions for the long term.

Through our services and our social commitment we constantly prove that success and responsibility are compatible with each other. A healthy environment is therefore our highest priority and we use environmentally friendly and approved recycled materials, reducing our emissions and our energy consumption. Through detailed preparation of every project we systematically look for areas where savings can be made. Beneficial to the customer; good for the environment.

We are a founding member of Deutschen Gesellschaft für nachhaltiges Bauen (DGNB) – the German Sustainable Building Council.

Intelligent and modern buildings require highly flexible solutions to meet all demands.

Over 200 designers, engineers and technicians in our central Research & Development Department in Arnstorf work to develop the fulfillment of the architect's or the customer's requirements – this way we ensure that your project runs perfectly.

At our headquarters we manufacture partition and flooring solutions as well as ceiling systems. Due to our ability to adjust to new technologies we will be able to provide you with the same level of quality in the future. As a large manufacturer in the modern interior fit-out industry, we are constantly setting design, performance and flexibility trends with our products.

Our integrated project management process ensures perfect **installations** – even in large international projects.
