

## **Press release 02. September 2009**

### **Project reports provide a glimpse of Lindner competence in the facade sector**

Arnstorf, September 2009 - Recently the business division Facades at the Lindner group has been providing numerous project reports. A project report includes an exact description of a project, the products which were used and what the particular challenges of the project were - from the planning phase through to development. The aim of a project report is to familiarise potential customers with the extensive product and solution-orientated range of service that the Lindner Group has to offer. Furthermore the project report supplements the extensive literature concept of the interior work and facade specialists based in Arnstorf, Lower Bavaria.

At the moment the following project reports are available:

- Rotunda, Birmingham
- Terminal 5 at London's Heathrow Airport
- St. Paul's Square, Liverpool

You can request these reports in either German or English by writing to the following email address: [info@Lindner-Group.com](mailto:info@Lindner-Group.com)
