

## **Press release 25 August 2008**

### **Lindner clean room technology secures two large orders**

#### **Leading manufacturers rely on across-the-board service from the clean room technology specialist.**

Arnstorf, August 2008 - Lindner Reinraumtechnik GmbH is one of the leading providers of clean room systems in Europe. In recent months, the Arnstorf-based company has been able to secure two further large orders.

With an order volume of over 4 million euros for clean room-specific fit-out, the Arnstorf specialist will take responsibility, as a complete provider, for fitting out the main production plant of Silicon Sensor International AG in Berlin. The turnkey project will include all the relevant trades, starting with ceilings, partition walls and flooring systems, right through to air conditioning and cooling systems, media supply, building management systems, UPS-supported emergency systems and electronic engineering. The installation period is 10 months.

The second large order, the conversion of the Merck Serono International S.A. production plant in Geneva, includes in addition to more than 5000 m<sup>2</sup> of aluminium clean room ceilings and 7500 m<sup>2</sup> of clean room partition walls, the complete fit-out of the remaining plant. The order volume is almost 4 million euros. The new facilities will be integrated into the existing production plant and within 12 months will be brought up to the state of the art.
