

Authority for Urban Development and Environment

Hamburg, Germany

Project Description

The colourful new office building of the Hamburg Authority for Urban Development and Environment is winding through the suburb of Wilhelmsburg at a length of 200 metres. The entire complex is structured in a 5 storey high main building and a southeasterly situated 13 storey and 55 metres high tower. The new site brings together the staff from four different departments spread over Hamburg. The highlight of the interior fit-out works are the newels staircases, connecting the different floors.
