

Laos Parliament House

Vientiane, Laos

Project Description

The Parliament in Vientiane, the capital of the Southeast Asian Republic of Laos, is considered one of the country's landmarks: With its traditional yet unusual design, the building impresses both from the outside and the inside. The main plenary hall hosts the National Assembly about twice a year and offers enough space for the members of parliament.

In cooperation with the Vietnamese partner NQC Co. Ltd, Lindner was responsible for the project delivery of the main plenary hall. A glance upwards reveals one of the highlights of the parliament: the gigantic domed ceiling. It was designed and produced by Lindner in Germany. Thus, the dome with the adjoining flat ceiling was divided into different sections and executed as a metal ceiling. In addition, there are artistic ornaments made of Lincrete and LED lights that bathe the hall in a pleasant light. Furthermore, Lindner was commissioned with the project planning and delivery of the floor system: the FLOOR and more® arena hollow floor system impresses with high load-bearing capacity and quick installation.

General

Building Type	Government Buildings
Company Division	Lindner SE I Interior Product Supply
Completion	2020
Architect	Jointventure Archineer Associates (Laos) + VNCC (Vietnam)
Construction Management	THANH AN CORPORATION

Completed Works

- **Ceilings**
Metal Ceilings
- **Floors**
Calcium sulphate panels
FLOOR and more® arena 892 sqm
- **Luminaires**
Downlights 1360 Pcs
