

Strulik BCF

Damper

Different ventilation components of Strulik can be integrated into LMD fire rated metal ceilings. The required cut-outs in the ceiling elements are adapted to these ventilation components.

- Integration of Strulik ventilation components possible
- Cut-out in ceiling element adapted to ventilation components

Technical Details

Strulik Damper BCF-K30 ER-ZX/125

nominal size: Ø 125 mm
connection size: Ø 125 mm
min. ceiling element width (central installation): 251 mm
max. ceiling element width (depending on system): 847 mm

Strulik Damper BCF-K30 ER-ZX/160

nominal size: Ø 160 mm
connection size: Ø 160 mm
min. ceiling element width (central installation): 286 mm
max. ceiling element width (depending on system): 847 mm

Strulik Damper BCF-K30 ER-ZX/200

nominal size: Ø 200 mm
connection size: Ø 200 mm
min. ceiling element width (central installation): 326 mm
max. ceiling element width (depending on system): 847 mm
