

Wildeboer BV90

Fire Protection Valve (Series BV92)

Different ventilation components of Wildeboer can be integrated into LMD fire rated metal ceilings. The required cut-outs in the ceiling elements are adapted to these ventilation components.

- Integration of Wildeboer ventilation components possible
- Cut-out in ceiling element adapted to ventilation components

Technical Details

Wildeboer Fire Protection Valve BV92-100

nominal size: Ø 100 mm
connection size: Ø 100 mm
min. ceiling element width: 231 mm
max. ceiling element width (depending on system): 847 mm

Wildeboer Fire Protection Valve BV92-125

nominal size: Ø 125 mm
connection size: Ø 125 mm
min. ceiling element width: 256 mm
max. ceiling element width (depending on system): 847 mm

Wildeboer Fire Protection Valve BV92-160

nominal size: Ø 160 mm
connection size: Ø 160 mm
min. ceiling element width: 291 mm
max. ceiling element width (depending on system): 847 mm

Wildeboer Fire Protection Valve BV92-200

nominal size: Ø 200 mm
connection size: Ø 200 mm
min. ceiling element width: 331 mm
max. ceiling element width (depending on system): 847 mm
