

Königstadt-Quartier at Alexanderplatz

Berlin, Germany

Project Description

The Königstadt-Quartier is located at Pauline-Staegemann-Straße 2, in the middle of Berlin's dynamic capital. This central location, just a few minutes' walk from Alexanderplatz, allows residents and visitors to reach the pulsating heart of the city in no time at all. The quarter is surrounded by a wealth of different neighbourhoods and districts, guaranteeing a diverse range of activities right on the doorstep – whether shopping, culture, nightlife or recreation.

The Lindner Group played a significant role in the development and realisation of the Königstadt Quartier. The aim was to give every single room in the building complex a unique atmosphere that would meet the high demands of residents and visitors. The installation of various products, including wooden doors, one-and-a-half-leaf residential entrance doors as well as ceilings and walls made of plasterboard, gave the interior an appealing and stylish character. In addition to the fit-out of approx. 120 flats, Lindner also undertook the complete furnishing of the entrance lobbies. Comprehensive screed, parquet and painting work complete the service package.

General

Building Type	Residential, Office buildings
Company Division	Lindner SE Ausbau Mitte.Ost
Completion	2020
