

FIREwood

Composite wall cladding

Sound-absorbing, real-wood-veneered and non-combustible – the calcium sulphate panel FIREwood provides the perfect solution for high-quality wall- and ceiling claddings in rescue and escape routes, necessary corridors, staircases and meeting rooms. The composite material with real wood veneer easily combines real-wood surfaces, fire protection and good acoustics.

- all timber types possible
- individual design due to diverse joining technology
- sound-absorbing due to micro-perforation
- grand formats without sagging
- environmental compatibility
- high level of prefabrication
- rated according to DIN 4102
- available as class A2 (noncombustible) and B1 (flame-resistant)

Examples for areas of application

Public Areas: Entrance Areas, Escape Routes

Public Institutions: Courts and prisons, Government and municipal buildings

Hotels and Gastronomy: Hotels and Resorts

Businesses, Recreation and Culture: Places of Assembly, Concert Halls, Theatres and Opera Houses

Education: Higher education institutions and universities, Schools

Work: Office buildings, Assembly Rooms

Technical details

Technical Details

Climate area	10 - 35 °C
Swelling and shrinkage behavior	max. 0.1 mm/m
Surface soundness	approx. 0.8 N/mm ²
Acoustic design	Acoustic fleece Perforation Grooves
Carrier panel	Calcium sulfate Gypsum-fibre
Edge design (panels)	Veneer edge Coloured edge

Dimensions

Dimensions

Panel thickness	19 mm
Panel weight	23 kg/m ²
Length (L)	100 - 2550 mm
Width (B)	100 - 1220 mm

Acoustics

Room acoustics

Sound absorber class	ISO 11654		C
Evaluated Sound Absorption Coeff.	ISO 11654	α_w	0.65

Fire protection

Building material class

Building material class		of the composite panel
Building material class	EN 13501-1	B - s1,d0
Reaction to fire performance	DIN 4102 1	A2
Designation by the building authorities	DIN 4102 1	non-combustible

Surfaces

Surfaces

Surfaces	Real wood veneer
Perforations	PE 8/8/1.5/3.5-1 LI 14/2.0-1

Sustainability

Declarations

Emission report	An expert opinion is available for the product with regard to its emission values. The test laboratory is accredited according to ISO 17025 and notified for EN 16516.
French VOC Regulation	Emission class A
Product Self-Declaration	A self-declaration in accordance with ISO 14021 is available. This contains extensive environmental information for planning, tenders and building certifications (LEED, DGNB, EU taxonomy).

Key figures

Recycled content	100 %
Building material class	bei der GFT-Platte.

Indoor air measurement EN 16516 options	< 5 µg/m ³
Formaldehyde emissions	< 3 µg/m ³
Evidence	
Indoor Air Comfort	Accomplished
Indoor Air Comfort Gold	Accomplished
AgBB	Accomplished
BREEAM International	Conform
LEED v4	Conform
DGNB	Conform
Green Level Certificate	<div style="border: 1px solid green; border-radius: 10px; padding: 5px; display: inline-block; margin-bottom: 10px;"> High  </div> <p>Circularity: All components can be reused/ refurbished</p> <p>Life Cycle Assessment: Life Cycle Assessment according to DIN 14067 (Product Carbon Footprint) on request</p> <p>Cradle to Cradle Certified®: no C2C Certified® label available</p>
