VIENNA INTERNATIONAL AIRPORT - SKYLINK TERMINAL

VIENNA, AUSTRIA
Description:

The new Skylink terminal at Vienna Airport connects directly to the existing airport. The new terminal building consists of two parts: The new south pier and the new terminal which provides check-in desks, a modern baggage sorting system, shops and restaurants. Lindner supplied a customised metal ceiling and fitted hollow floor systems, which withstand heavy loads.
Completed Works:

- Hollow floor systems
- FLOOR and more®
- FLOOR and more® power
- Raised floor systems
- LIGNA
- F0 Metal ceiling
- LMD-E - Hook-on/Corridor ceilings
