

The image shows the interior of the Ottawa Light Rail Transit Parliament Station. The ceiling is a prominent feature, composed of large, angular panels in shades of yellow, blue, and pink, creating a dynamic, geometric pattern. Long, white, illuminated light fixtures are suspended from the ceiling, providing bright lighting. In the foreground, a row of turnstiles is visible, each with a green illuminated arrow pointing upwards. In the background, a digital display shows "Emory's Pasture 1 min" and other station information. The overall atmosphere is modern and vibrant.

OTTAWA LIGHT RAIL TRANSIT – PARLIAMENT STATION

OTTAWA, CANADA

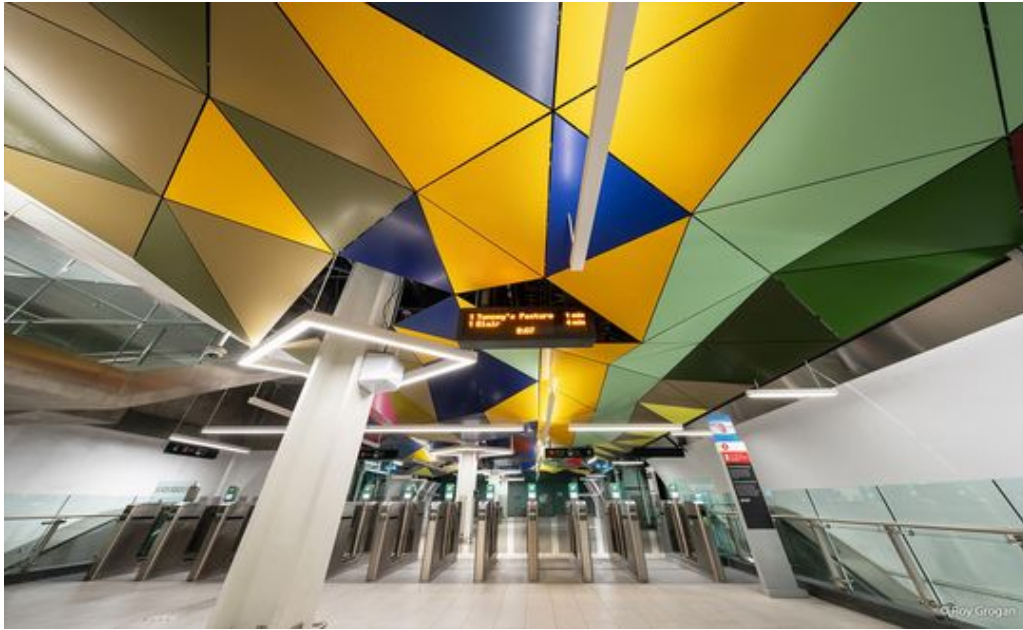

Description:

Large format triangular panels were used in this functional art installment (*Lone Pine Sunset*) by Vancouver artist, Douglas Coupland. The Ottawa Parliament Station ceiling's are clad with Lindner perforated metal panels in 50+ various colors depicting a geometric sunset.
