

# KULTURPALAST

DRESDEN, GERMANY

## General:

Concept/Product:	Floor Systems, Interior fit-out and furnishings, Ceiling Systems, Dry lining systems, General contracting
Building Type:	Concert hall/Theatre/Lecture theatre/Function rooms
Client:	Kommunales Immobilienmanagement Dresden
Architecture:	gmp Architekten von Gerkan, Marg und Partner
Company Division:	Lindner SE   Fit-Out Central.East Germany, Lindner SE   Interior Fit-out and Furnishings
Completion:	2017

## Description:

Since 1969, the Kulturpalast of Dresden has been one of the most distinctive cultural establishments of the GDR and stayed the most important venue of the city even after the German reunification. After 40 years of use, the "Kulti" closed in 2012 on the occasion of a complete modernisation and redevelopment.

Lindner AG was responsible for the fit-out and the coordination of all works incl. building services and stage equipment of the concert hall, the cabaret hall as well as for the restoration of the heritage-protected Mogi Ceiling in the Foyer. What followed was an immediate involvement in the project right after the closure of the contract, where Lindner carried out the complete production and installation planning as well as the engineering in 3D models for the concert hall. As a preparation for the redevelopment, Lindner Gerüstbau GmbH was contracted with the construction of 21.500 m<sup>3</sup> of complex scaffold structures. Within 18 days, about 110 tonnes of scaffolding material have been installed under sophisticated circumstances. The steel substructure of the hall was clad with specially-folded triangular gypsum fibre panels. As to the walls, both gypsum fibre systems and fire protection claddings with real-wood veneer of type FIREwood have been installed. The floor system of choice was the specialised FLOOR and more<sup>®</sup> arena. The ground floor houses a completely decoupled cabaret hall, for which Lindner developed an acoustically effective expanded metal wall and ceiling cladding and supplied further ceiling claddings as well as custom doors. The contract for the faithful restoration of the monolithic gypsum ceiling (Mogi) in the foyer could be put into practice thanks to the finding and further development of original templates.

## Completed Works:

### Hollow floor systems

FLOOR and more® arena

### Raised floor systems

NORTEC

### Walls

FIREwood wall claddings

### Furniture

Built-in fixtures

### Ceilings

FIREwood ceiling claddings

### F0 Metal ceiling

LMD-St - Expanded Metal ceilings

### Plasterboard ceiling systems

Plasterboard ceilings

Mogi Ceiling

Perforated plasterboard ceilings

### Plasterboard partition systems

Plasterboard wall lining systems

### Implementation planning

Production and Installation Planning, partially in 3D

### Systems

Glazed wall elements

### Building site equipment

### Scaffolding works

### Steel construction works

### Door and gate systems

Steel plate doors

Fire protection doors

Wooden Doors

### Carpenter works

Mobile partitions

Fittings

### Locksmith works

Parapets

Banisters

### Painter, paperhanging and varnishing works

**Floor covering works**

Parquet

Carpet / carpet tile
