

FRAPORT - ROOM OF SILENCE

FRANKFURT AM MAIN, GERMANY

Description:

With approximately 61 million passengers each year (2016), Frankfurt Airport sees a lot of activity around the clock. In order to provide a calm place of retreat in this environment, the operating company Fraport created the Room of Silence. This free offer is directed to all passengers regardless of their ideology, religion or ethnicity. The highlight of the otherwise white room is a golden, wavelike ceiling with integrated luminaires. Their light mirrors onto the floor and walls. The centre of the room filled with an oak-wood bench.

Lindner AG developed and produced the custom hook-on ceiling for the Room of Silence. Thanks to a 3D structural surface of the type TOUCHdesign Lunar, the ceiling system unfolds a unique effect, which is underlined by the wavelike arrangement of the ceiling. A particular aura is created as a result. In addition to this, the scope of works of Lindner included the installation of FLOOR and more® hollow floors and coating works on walls and the floor.
