

MODERNISATION OF OTTO HEADQUARTERS

HAMBURG, GERMANY

Description:

The Otto Headquarters have been based in an office building on Bramfelder Campus in Hamburg since 1982. Lindner was the general contractor responsible for the complete fit-out during the refurbishment of these company headquarters. After the complete stripping down to the shell, both the implementation of all building services and the execution of all interior-fit works were performed from one source. In-house expertise of our Lean Construction Management department ensured a punctual outcome in terms of time and quality.
