SPACEOFFICE

WEIDEN I. D. OPF., GERMANY

Description:

Samhammer AG is an international full-service provider with 25 years of experience and more than 500 employees in the helpdesk, e-commerce and terminal service divisions. With the SpaceOffice, the company expanded its headquarters in Weiden in der Oberpfalz. The building is characterized by "spacey" design, both in terms of the futuristic look and the open space design. It offers 170 jobs for the software development, logistics and the newly founded Technological Institute for Applied Artificial Intelligence (TIKI).

Lindner contributed to the SpaceOffice of Samhammer AG with plasterboard heating / cooling ceilings. These are found, on the one hand, with smooth surface in the open-plan offices of the building, where they interact with the inactive, perforated surfaces, thus creating a visually exciting image. At the same time, they ensure the comfortable and energy-efficient temperature control of the rooms. In addition, the blankets were also installed in numerous meeting rooms in the SpaceOffice, and the system also controls the temperature there.

General:

Concept/Product:	Heating and cooling technologies
Building Type:	Office buildings
Client:	Samhammer AG
Architecture:	Yellow Space Architektur
Architecture:	Architekturbüro Manfred Schwemmer
Company Division:	Lindner SE Heating and Cooling
Completion:	2018
