esatus AG, the IT specialist for information security and CJe GmbH, the well-established DevOps system builder, have merged in order to continue their successful journey. Their joint activities will now run under the name of esatus AG. esatus has recently been able to secure the capital required to accelerate growth in the field of digital identity.

The Lindner Group will be investing a seven-digit sum to support future growth in the area of decentralised identity management, globally known as Self-Sovereign Identity (SSI). With the esatus product SeLF and the associated Wallet App esatus has secured a strong foothold in this sector. The process based on distributed ledger technology is to be established as a market standard for self-sovereign digital identities via various use cases.

The first joint project with Lindner is an SSI-based coordination tool for project management of building construction sites. The platform is intended to revolutionise physical access to the site while ensuring compliance with all legal requirements.

Jürgen Eichhöfer, CEO of esatus AG, comments on the closed partnership: "We are pleased to have won the Lindner Group as a strong partner for our continued growth. Lindner and esatus are a perfect match. We both share the firm conviction that through technological innovations we can make the world a better and simpler place. From the very first meeting it was clear that we both have a long-term and sustainable vision".

Veronika Lindner, Chairman of the Board at the Lindner Group, says: "Using the high technological skills of esatus AG and its IT development expertise, we aim to make construction more efficient and economical. Our goal is to accelerate processes considerably with the help of innovative technologies, while ensuring data consistency and compliance in line with the General Data Protection Regulation (GDPR). We are going to share these improvements with the entire industry. We appreciate the high motivation and expertise of the esatus team and are looking forward to our common future".

Bauen mit neuen Lösungen

esatus AG: esatus AG is a medium-sized consulting company with a successful track record of more than 30 years. It is headquartered in Langen (Hesse). True to the company mission “Enforcing Information Security”, it is the partner of choice for projects and products in this area, also focusing on DevOps for major customers. esatus AG is committed to sustainable digitalisation and digital sovereignty. Its management principles are based on agile innovation. Since 2015 esatus has been focusing on Self-Sovereign Identity (SSI) as a future-oriented topic with global change potential and continues to develop its SSI expertise and products for technological leadership. Several flagship projects are currently under way proving the success of the SSI strategy, paving the way to a large-scale implementation in a variety of business sectors.

Lindner Group: The Lindner Group sets standards in the development, production and execution of individual project solutions for interior fit-out, building envelopes and insulation technology. Through constant innovation, highest quality standards and sustainable corporate management, Lindner has become the world’s leading full-service provider for interior fit-out construction. The Lindner Group makes targeted investments in innovative companies, with the aim to successfully shape the digital change.
