Vision becomes reality.
Dear Friends of our company,

Many of our customers were impressed by our Reference Book, “Vision becomes reality.”. You are now holding the second edition in your hands and we know that you will be amazed at what we have achieved since then!

You will come across fantastic Lindner buildings from all over the world. We are proud of the way we turn our customers’ visions into reality. You will also notice our new and interesting areas of expertise which enhance our range of services. See our know-how for yourself, our willingness to provide our customers with maximum efficiency and our ability to recognise new trends (e.g. sustainable building methods) and consistently integrate them into our work.

You are welcome to come and visit us in Arnstorf or at any other of our locations worldwide. See our productivity and capabilities first hand.

Have fun browsing the new edition of “Vision becomes reality.”!

yours sincerely

Building new solutions.

Lindner undertakes major worldwide projects in all areas of interior finishes, insulation technology, industrial services and building facades. From pre-planning through to project completion Lindner is your partner of choice.

The Company’s extensive manufacturing capability enables quality to be strictly maintained whilst allowing maximum flexibility to meet individual project requirements.

Environmental considerations are fundamental to all Lindner’s business principles.

Through partnerships with clients Lindner turns concepts into reality.
Everything from one source.

We offer you all our products and services individually or as a customised process chain – starting from your idea all the way to turnkey handover. Procedures intelligently geared to one another guarantee you made-to-measure solutions and efficient construction with far fewer interfaces.

AIDA luna, Cruise Ship

The design in the various areas is characteristically AIDA: progressive, young and cosmopolitan. The brightly designed “Sternbar” especially attracts on-board guests.

Architect: Partner Ship Design
AIDA luna | Cruise Ship
- wall claddings
- column claddings
- ceiling claddings
- customised ceilings
- customised furniture and fittings
- tiling works
- parquet works
- doors
- window decorations
With its wave shaped walls and overlapping ceiling panels, this modern concert hall satisfies the highest acoustic requirements. The intricately worked wooden panelling in the stalls makes a special contribution to the room acoustics.

Architect: Ateliers Jean Nouvel
Danish Radio Concert Hall | Copenhagen

- concert hall walls made of gypsum fibre pre-formed elements
- customised wooden ceiling construction
- spectator stands in wooden panelling
- parquet flooring
- wooden canopy ceiling in the concert hall
- glass balustrades for steel bridges and stairs
- complete fit-out of Queen’s Lounge
- acoustic ceilings in the foyer
- FLOOR and more® hollow floors
- FLOOR and more® comfort hollow floors (with underfloor heating)
- NORTEC raised floors
- wooden doors with fire protection and sound insulation, integrated into waved-shaped wall claddings
The structure was created with the high quality product PUREline – aluminium components with real wood veneer. These components made it possible to integrate wooden surfaces into the “Hotel Envelope” despite demanding structural and fire protection requirements.

Architect: ADPI Designers and Planners / Dar Al-Handasah (Shair and Partners)
Dubai International Airport, Concourse 2 | Dubai
– customised real wood veneered strip panel ceilings and wood effect PUREline wall claddings
– curved, real wood veneered, aluminium cooling fins
The highly complex 3D facade is a unique construction. The surface of the facade was given a crystalline finish, lending it somewhat of a honey-comb effect.

Architect: Sturgis Associates
Fleetway House | London
- unitised facade
- sheet metal facade
- baffle facade
- lobby
- doors
Andel’s Hotel, Berlin

The phenomenal light fittings lend each room a special character. The shapes blend with the individual areas of the hotel in ways that are always different and always new.

Architect: IGP Ingenieur AG
Andel’s Hotel | Berlin

- Plafotherm® chilled gypsum plasterboard ceilings
- perforated gypsum plasterboard ceilings
- mineral fibre ceilings
- complex gypsum plasterboard ceiling with perimeter cove lighting
- FLOOR and more® hollow floors
Museum Brandhorst, Munich

Partition walls support the unusual works of art and allow room for expansion. Exciting angled ceilings and specially integrated lights set the scene for the paintings and sculptures of the “Brandhorst Collection”.

Architect: Sauerbruch Hutton
Museum Brandhorst | Munich

- metal ceilings
- non-perforated and perforated gypsum plasterboard ceilings
- gypsum plasterboard partitions
- gypsum plasterboard facings
- wooden doors with fire protection and sound insulation
- sliding doors
- FLOOR and more® hollow floors
- LIGNA raised floors
We thought of everything here!
The highly technical requirements relating to clean rooms were completely satisfied and new
developments in this area were integrated – in complete accordance with the customer’s wishes.

Architect: Althoff Industrie- und Verwaltungsbau GmbH
Silicon Sensor GmbH | Berlin

- planning of clean rooms including air conditioning, electricity, measurement, control and feedback technology
- coordination of all works, of the architectural requirements and provision of basic supplies
- sandwich clean room partitions
- FLOOR and more® hollow floors
- PRODATA clean room raised floors
- Crossdata clean room ceilings
- clip-in cassette ceilings
VR Credit Bank, Dachau

This branch of the VR bank features a light, friendly and inviting atmosphere throughout the building. The materials used create a pleasing effect, where functionality and design come together.

Architect: Architekturbüro Lewald
VR Credit Bank | Dachau
- Plafotherm® chilled baffle ceilings
- Lindner Life glass partitions
- NORTEC raised floors
- FLOOR and more® hollow floors
WDR Broadcasting, Cologne

The contemporary, curved glass walls were installed with laminated safety glass. The fire protective ceilings match perfectly with the design of the walls and provide a high level of safety in the event of a fire.

Architect: Lorber + Paul Architekten
WDR Broadcasting | Cologne
- Lindner Life glass partitions
- fire protection metal ceilings
- commercial doors
- NORTEC raised floors
– AIDA luna | Cruise Ship
– Andel’s Hotel | Berlin | Germany
