

**ADD.VANTAGE  
SECURITY**

**„PREPARED FOR ANY DANGER.“**

A modern research and development laboratory with large curved acoustic panels. A man in a black shirt is on a ladder pointing at a panel. Two other people, a man and a woman, are looking at a tablet. A wooden table is in the foreground.

## ADD... | SECURITY RESEARCH AND DEVELOPMENT

- + own research and development department with more than 200 employees
- + focus on building physics, above all acoustics and fire protection
- + reliable network of partners such as materials testing institutes and universities

# ADD... | SECURITY FIRE PROTECTION

cross-trade, integrated fire protection solutions

new developments and project-specific special solutions

safe, professional and formal verification

## ADD... | SECURITY STRUCTURAL DESIGN

- + complex constructions in the context of execution planning
- + national and international proofs of stability and statics
- + calculation and interpretation of project-specific requirements

# ADD... | SECURITY

## GUNFIRE

preventing the release of splinters and life-threatening fragmentation

meeting the highest safety standards through proven field tests

no aesthetic or functional impairment

# ADD... | SECURITY EXPLOSIONS

explosion-resistant security solutions for interior fit-out and facades

seamless integration into architectural systems without stimulating public anxiety

tested to the highest quality standards

# ADD... | SECURITY EARTHQUAKES

earthquake-tested system products  
for floors, ceilings, walls and facades

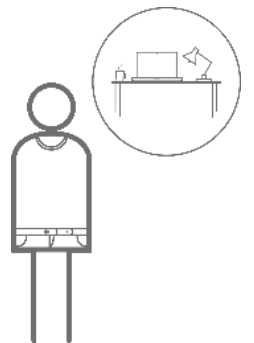

project-specific adaptation to  
aesthetic and functional requirements

Earthquake test for  
a facade system
