

# Disposal Costs Too High?

Reduce Your Costs by  
Returning Used Floor Panels

 **Lindner**

# We Are the Refreshers

## Circular Construction: For Others Still a Vision, for Us Already Reality

The Lindner Group is Europe's leading full-service provider for interior fit-out, building envelopes and insulation technology. Our high level of manufacturing expertise allows us to develop and implement tailored yet flexible solutions, making us a reliable partner throughout all project phases.

Responsible thinking underpins all our actions. We are pioneers in "Sustainable Building": from being a founding member of the DGNB (German Sustainable Building Council) and creating our first in-house lifecycle assessment in 2011 to achieving continuous certifications according to the Cradle to Cradle Certified® product standard for ceiling, floor, and wall systems since 2017. We have also embraced new **circular business models, such as purchase with return and renting of products**, driving constant innovation.

"Building with new solutions" means not only implementing innovative ideas for construction products worldwide but also paving the way towards a more sustainable and climate-conscious construction industry.

Together, we create Add.Vantage by putting the environment, people, and health at the forefront – today and for a world that's worth living in.

The Reuse of Used Floor  
Panels – A Quick Guide

# A Heart for Floor Panels

Disposal Was Yesterday, Reuse Is Today.

## Our Offer

Are you currently dismantling a building and have come across a well-preserved raised floor system? Get in touch with us! We come to you, examine the panels and make you an offer. With the delivery of the used floor panels to us, your costs will be considerably lower than the otherwise necessary landfill. Contact us! We will be happy to advise you and assure you of speedy processing.

## Your Advantages

- significant cost savings compared to disposal
- simple handling thanks to our offer for dismantling and transport to our factory
- certificate verifying CO<sub>2</sub> savings
- active contribution to climate protection and resource conservation

## Our Motivation

We are committed to the environment and aim to counteract resource scarcity: Instead of costly disposal at the end of their lifecycle, we focus on the refurbishment of building materials.

With our refurbished floor panels, we actively combat the waste of valuable resources and help preserve the environment.

# Which Raised Floor Panels Do We Take Back?

- with and without surface application
- with and without application on bottom side
- core made of gypsum fibre or chipboard
- only full panels
- independent from manufacturer
