

LMD-K 420

Clip-In/Swing-Down cassette ceiling

Due to a completely concealed substructure, the system LMD-K 420 has a closed ceiling surface. The uniform joint design structures the view of the ceiling. The maintenance-friendly system provides access to the ceiling void by means of cassettes that can be either removed or separately swung down and slid along the Clip-In profiles.

- homogeneous ceiling surface due to concealed substructure
- maintenance option due to ceiling panels that can be individually operated and swung down
- hygienic and easy to clean
