

This high-grade baffle ceiling is especially suitable for areas with increased maintenance demands. Due to movable two-piece baffles, you can comfortably reach the ceiling void. The linear baffles can quickly and easily be installed in different sizes and centre distances. Free spaces between the baffles can be used for different installations such as luminaires, sprinklers or for the suspension of signs.

- + freely selectable centre distances and baffle dimensions
- + independent installation of luminaires and fixtures possible between baffles
- + visible ceiling void
- + easy and quick installation
- + easy maintenance option due to baffles that can be individually slid without tools
