

LMD-St 213

Hook-On expanded metal ceiling with accentuated joints

The system LMD-St 213 impresses with design freedom and ease of maintenance. Diverse mesh types, shapes and sizes are available. The ceiling panels can be removed – a combination with Swing-Down ceiling panels is also possible. Create visual highlights with accentuated joints up to 30 mm, or expanded ceiling panels with backlighting.

- homogeneous ceiling surface due to concealed substructure
- many design possibilities thanks to different mesh types, shapes and sizes
- the possibility to see – to a greater or lesser extent – into the ceiling void depends on the mesh or the requirement
- installation of illumination or further fixtures in the ceiling void is possible in case of a high open area
- ceiling layout with accentuated joints in both directions possible
- easy maintenance option due to ceiling panels that can be individually operated, swung down and slid without tools
