NOVATEK

Moskau, Russia

Lindner

Lindner

Project Description

The new 12-storey office building of NOVATEK, a big Russian gas producing company, is one of the first in Moscow to be built according to European standards. Lindner designed, produced and installed a specially constructed Hook-On ceiling featuring 800x300 mm ceiling panels with non-standard perforation. Furthermore, Lindner furnished the modern building with LIGNA and NORTEC raised floors, the latter coated with PVC in some areas.
