Project Description

As part of the renovation and construction works, a new diagnostic-internistic -neurological clinic was built in house 27 of the University hospital Carl Gustav Carus. In addition to that, house 19 was completely refurbished. To connect the two buildings, a transparent corridor was built. The performance of Lindner includes the installation of hollow floor and raised floor systems, metal ceilings, wall claddings and plasterboard acoustic ceilings, as well as extensive dry lining works.
