Jupiter Centre

Riga, Latvia

Lindner

Lindner

Project Description

The 14 storey high Jupiter Centre is a modern B-class office building with conference rooms and cafeteria, situated in the new business center of Riga. Lindner produced and delivered heated and chilled metal ceilings with integrated lights. The customised ceiling system combines post cap ceilings with active chilled beams for the use in open space areas. Due to their special form and the integrated heating and cooling technology, the chilled beams achieve very high capacities.
