Cutty Sark

London, United Kingdom

Project Description

Cutty Sark is a true London landmark and national icon of British maritime history. Built in 1869, Cutty Sark is the only surviving example of a clipper ship. As part of the renovation, the ship was raised three metres from the floor of the dry dock to allow the construction of a state of the art museum space below. Lindner installed a FLOOR and more® comfort hollow floor to the museum and reception areas, with an area of FLOOR and more® in the ship's bow and cafe.
