# Project Description

Mauritius International Airport is located 48 km southeast of the capital Port Louis. The new terminal extends over three levels and covers an area of 56,900 m<sup>2</sup>. It is the biggest infrastructure construction project in the history of Mauritius and doubles the previous passenger capacity of the airport. Lindner delivered expanded metal-, suspended- and baffle ceilings as well as glass and timber partitions, which were fitted in the baggage claim area of the arrival hall.
