Project Description

With over 100 European airport shops heinemann is one of the largest chains of Duty Free shops worldwide. With exceptional shop concepts, an extensive range of premium brands and motivated employees, Heinemann was able to keep up the trust of its customers throughout its 135-year history.

One of Heinemann´s shops is located at Vienna Airport. In order to give this shop a special charisma, it was redesigned. It was intended that the ceiling would play an important role as a design element. With this project, Lindner once again proved its competence and reliability as a partner for special solutions. The optical and technical requirements fromt he ceiling could be met with a custom system from the LMD-DS product family. This ceiling serves as an eye-catcher while skillfully complementing the overall look of the room.
