Project Description

The newly constructed annex of the Regensburg district administration offers a modern working environment for the officials. All departments of the authority are now united under one roof, thanks to the existing building and its new annex.

The Lindner Group delivered a large scope of works with this project. The scope included plasterboard walls with integrated transom windows, which illuminate the corridors in the building with natural and pleasant light. Lindner also supplied large quantities of ceiling systems, both plasterboard and metal. The majority of these ceiling systems have integrated heating and cooling technology, enabling easy and pleasant regulation of the room temperature.

General

Building Type	Town Halls, Government and Administrative Buildings, Public and institutional buildings
