EFRE Centre of Technology

Dresden, Germany

Lindner

Lindner

Project Description

The newly constructed EFRE centre of technology of the Dresden University of Technology features highly specialized testing facilities for Germany´s largest Research institute on electricity connection technology. This building centralizes numerous testing facilities of the University´s internal institutes, whom used to be scattered across the campus.

Lindner Reinraumtechnik GmbH fitted the building´s sophisticated clean room areas with ceiling systems and integrated ventilation components. Lindner floors were also the system of choice for this facility.

General

Building Type	Utility Rooms
Company Division	Lindner SE | Clean Rooms
Completition	2012 - 2013
Client	Sächs. Immobilien- und Baumanagement Leipzig I
