

# Office and practice building

Leutkirch im Allgäu, Germany

© Lindner, Arnstorf (D)

# Project Description

This ecologically sustainable new construction plays an important role in the revaluation of Leutkirch's railroad station district. This multipurpose building houses a variety of carefully selected tenants, including the administration of the local bank and a centre for dialysis.

Lindner heating and cooling ceiling systems were installed in all areas of the building, providing a both aesthetic and functional solution for controlling room temperature.
