

Deutsche Rentenversicherung

Berlin, Germany

Project Description

The six-storey headquarters of the 'Deutsche Rentenversicherung' (German pension scheme) was extensively renovated, mostly due to sophisticated fire safety standards. The building's open-plan offices now offer modern working environments for the employees of the authority.

Lindner Objektdesign GmbH contributed to the high quality interior fit-out with wall claddings and integrated hall cupboards. These systems, 12 kitchenettes and many pieces of customised furniture in the lavatories are performances by Lindner.
