Project Description

A VIP lounge with the standards of a 5-star hotel: In Terminal 1, Building 222 at Frankfurt Airport, a new VIP lounge was recently opened. The lounge now serves as a reception area for guests arriving and departing from Frankfurt Airport.

The Lindner Group was awarded the contract for the complete furnishing of Fraport's VIP lounge, playing a key role in creating a luxurious and comfortable environment for travellers. To achieve this high quality result, Lindner installed 1.031 square metres of plasterboard, mineral fibre and coffered ceilings in the building. Flooring systems, plasterboard walls and floor coverings were also supplied by Lindner. High-quality wallpaper and tiles, as well as plaster, stucco, painting and varnishing, give the entire lounge an elegant character. This was complemented by timeless glass display cabinets and powder-coated steel profile handrails. Lindner system products are not only found in the common areas, but also in the sanitary facilities of the VIP lounge – e.g. LMD expanded metal ceilings. The interior fit-out is rounded off by various door and gate systems in sheet steel and stainless steel, as well as a planned delivery from the object design business unit.

General

Building Type	Airports, Transportation Structures
Company Division	Lindner SE | Fit-Out Central.East Germany
Completition	2022 - 2023
Construction Management	Fraport AG

Completed Works

- **Ceilings**
