Project Description

The newly built Centre for Stroke and Dementia Research at Campus Großhadern houses two institutions with similar objectives: the Institute for Stroke and Dementia Research and the German Center for Neurodegenerative Diseases. Together, these institutions investigate the causes for common illnesses like strokes and dementia, then try to develop appropriate remedies.

Lindner fitted the office areas bordering the laboratories with heated and chilled ceiling systems. The rooms' temperature may so be adjusted with ease. In order to separate offices and laboratories efficiently, Lindner glass partitions and automated sliding doors were installed.

General

Building Type	Laboratories and Research Facilities
Company Division	Lindner SE | Heated and Chilled Ceilings, Lindner SE | Clean Rooms
Completition	2014
Client	Ludwig-Maximilians-Universität
Architect	Staatliches Bauamt München 2

Completed Works

- **Ceilings**
  Heated and Chilled Post Cap Ceilings
- **Clean Room**
  Clean Room Partitions
