# Project Description

The King Faisal Specialist Hospital is one of the prime examples for Saudi Arabia's high standard in neurosciences. Thanks to enormous investment packages in the healthcare system, this standard rose to an internationally recognized level and maintained this position over the last few years.

In order to create optimal basic conditions for research and treatment of brain damages and diseases, the BrainSuite iMRI was established at the King Faisal Specialist Hospital. iMRI stands for integrated hybrid operating room. The entire planning and fit-out of this project was carried out by Lindner Reinraumtechnik GmbH, benefiting strongly from the company's many years of experience in this field. After intensive planning and consulting, Lindner ceiling, partition and floor systems were fitted in the operating theatre, together with all necessary installations such as ventilation technology and electronics.

Clean Room Partitions  
Ventilation for Clean Rooms  
Clean Room Lighting

## General

<b>Building Type</b>	Clinics and Hospitals, Public and institutional buildings
<b>Company Division</b>	Lindner SE   Clean Rooms
