Project Description

Raumedic AG is an international supplier and development partner of the pharmaceutical industry. The company´s product range includes hoses, precision mouldings, catheters and other assemblies and systems. Raumedic coordinates its worldwide activities from their headquarters in Helmbrechts. The headquarters is also one of the three production sites of the company, which are all based in Germany. After steady growth in the last few years, Raumedic now employs a workforce of 600.

This constanct growth led the company into the expansion of its capacities available at the headquarters. A new building with 9,000 sqm of usable area was erected, sufficient space for up to 200 employees. The building features modern areas for clean-room production, laboratories, logistics and administration - a pillar for future growth, both for the Helmbrechts headquarters and the company as a whole. Lindner Reinraumtechnik GmbH, being a specialist for cleanroom environments, was contracted with numerous fit-out works in the production rooms.

General

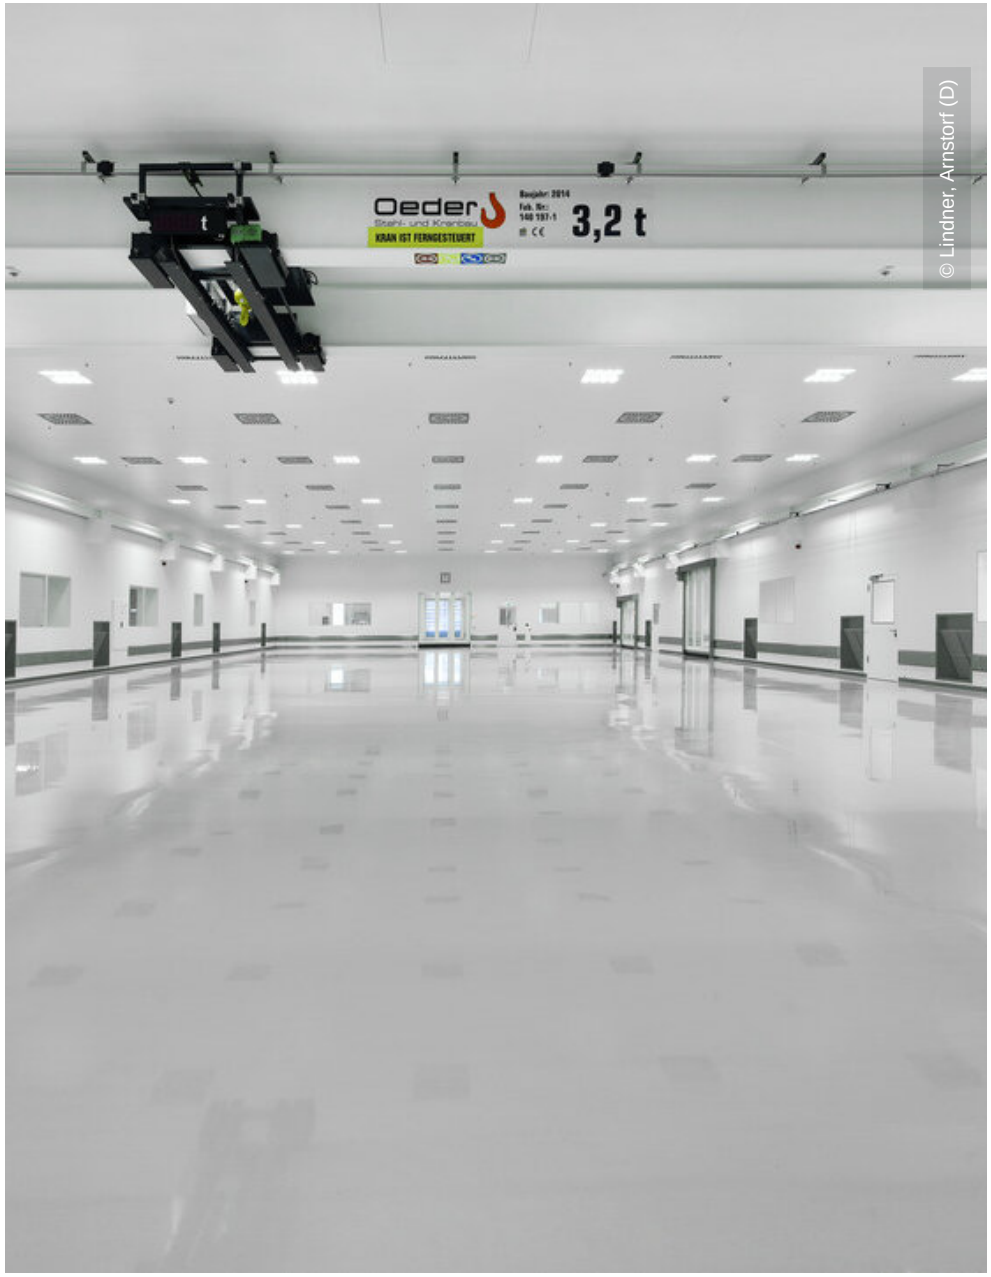

Building Type	Laboratories and Research Facilities, Clean rooms (electronics and semiconductor technology), Factories and Production Facilities, Industrial and commercial construction
Company Division	Lindner SE | Clean Rooms
Completition	2014 - 2015
