Project Description

The labelling and adhesive specialist HERMA cleverly used available space on top of its production facilities to build a two-storey administration building. Investing about 3.5 million Euros, HERMA created new office areas for 60 employees and built the capacities necessary for future growth.

Using numerous wooden and glass elements, the new construction´s interior architecture reflects the main building in regard of transparency and approachability. Lindner Floor and more® hollow floors are part of this concept, contributing to room appearance with parquet and fabric coatings.
