# Project Description

The Falkensteiner Holet & Spa Jesolo is a 5-star hotel with a glamorous appearance and the flair of Miami. Its guests enjoy 126 rooms and suites, and a first-class location directly at the beach of the legendary Italian seaside resort. Featuring a large wellness area and numerous bars and lounges, the hotel also promises relaxing holidays on the Adriatic coast outside of the main season.

As a part of the design theme "Miami", the interior design by Matteo Thun features numerous light colours and a few occasional pop art elements. The quality standard of the hotel designated clear structures and high-quality materials for each aspect of the building. As a consequence, Lindner Mobilier s.r.o. was contracted with carpentry works in the public areas of the building, including counters, wall claddings, tables, chairs, washstands and many more.
