

FIFA World Football Museum

Zurich, Switzerland

Project Description

The former „Haus zur Enge“ at Zurich’s Tessiner Platz has been extensively redeveloped to house the new museum of the FIFA. This striking building had been an iconic part of Zurich’s cityscape since the 1970’s. The museum features a multi-media exhibition that showcases the whole world of football. Exhibited originals such as the trophies of the men’s and women’s FIFA Football World Championships and over 1,000 other exhibition pieces, including the national jerseys of all FIFA member associations, are sure to excite any true football enthusiast.

Finding a highlight in regard of appearance in the exhibition and gastronomic areas is challenging, however, one of the most exciting parts are the 3,700 sqm of custom metal hook-on ceilings by Lindner, featuring aluminum plates that have various surfaces, ranging from powder coated over anodized to mirror polished bronze-golden plates, which have been combined with convection cooling ceilings type Plafotherm® KN. Other heating and cooling ceiling systems have been partly constructed with rounded metal honeycomb panels or executed as a ten metres long cooling canopy ceiling with acoustic plaster coating, respectively. Lindner also developed a custom solution for the elevator access rooms, which consisted of a wavelike metal wall cladding with a very small radius. Additionally, wall claddings from the COMPlacq line - executed as sound-absorbing elements - have been supplied for the exhibition areas.

General

Building Type	Museums and Exhibitions
Company Division	Lindner SE Branch Opfikon
Completion	2015 - 2016
Client	HRS Real Estate AG
Architect	SAM Architekten AG

Completed Works

- **Ceilings**
