

Modernisation of Otto Headquarters

Hamburg, Germany

Project Description

The Otto Headquarters have been based in an office building on Bramfelder Campus in Hamburg since 1982. Lindner was the general contractor responsible for the complete fit-out during the refurbishment of these company headquarters. After the complete stripping down to the shell, both the implementation of all building services and the execution of all interior-fit works were performed from one source. In-house expertise of our Lean Construction Management department ensured a punctual outcome in terms of time and quality.
