# Project Description

At the Alpen-Adria-Universität Klagenfurt extensive renovation work was carried out in the northern and central tract. The renewal of this infrastructure, most of which dates back to the 1970s, was a response to the University's good development in recent years. The measures brought more light, transparency and a contemporary sense of space into the buildings. In addition to the appearance, functional and energetic optimizations were made.

The lecture halls 1 to 4 were also fundamentally renewed and changed into light-flooded study rooms. The Lindner GmbH from Baden contributed the auditorium construction based on the floor system FLOOR and more® arena.
