

Hilton Garden Inn

Wiener Neustadt, Austria

Project Description

The four-star Hilton Garden Inn Wiener Neustadt offers a total of 133 rooms at the local city park, close to the city center.

Lindner installed hook-on and corridor ceilings with the surface design variant TOUCHdesign Lunar as a part of this project. These were installed in the reception area, in the corridors of the entrance area and in the restaurant. Its high-gloss surface made of hammered stainless steel gives the ceilings a special three-dimensional character, in which the colors and shapes of the room are reflected. In combination with a perforation and acoustic inserts, an equally functional and visually outstanding solution was created.
