# Project Description

With the newly built "Statement Site" in the south of Munich, Jaguar Land Rover opened its largest car dealership worldwide. The building is divided into five levels with a total area of approx. 20,000 m<sup>2</sup>, of which approx. 4,700 m<sup>2</sup> serve as exhibition space for current and also historical models of the two British premium brands. A total of around 100 vehicles are on display at the Statement Site. The second important pillar of the car dealership is the service area, which extends over two basement levels. Here, customers can enjoy an innovative service concept with a drive-through area, in which the full range of services is provided with 16 lifting platforms. The sustainable overall concept of the building has been awarded a BREEAM Excellent certification. The approx. 300 m<sup>2</sup> "Green Wall" in the exhibition area and the 15 quick-charging columns for cars with electrified drive are examples of this concept. The operation of the JLR Statement Site is the responsibility of the Bierschneider-British-Cars Group with approximately 70 employees on site.

Lindner SE was responsible for the implementation and coordination of numerous interior fit-out works in two construction phases, thus contributing to the high-quality design of the exhibition and service areas. The Lindner Group's product range was featured in the form of hook-on ceilings and plasterboard ceilings with integrated heating and cooling technology, which ensure efficient temperature control of the areas and at the same time contribute to the sustainable building concept. In addition, Lindner glass partition walls create spatial separation while maintaining a high level of transparency to facilitate confidential customer consultations.

## General

<b>Building Type</b>	Business premises, Building certification, Others
<b>Company Division</b>	Lindner SE   Fit-Out South.Southwest Germany
<b>Completion</b>	2019
<b>Client</b>	Jaguar Land Rover Deutschland GmbH
<b>Architect</b>	Hamacher, Daub & Partner, Fischer Architekten GmbH
<b>Building certification</b>	BREEAM
