Project Description

NDA is an India-centric, globally operating law firm with offices in India, Europe, the US and South-East Asia. FT ranks NDA as the Most Innovative Law Firm in Asia. It has established the Imaginarium AliGunjan, a blue sky thinking and research campus in Alibag near Mumbai. The building complex is used for conducting research in legal, tax and ethical issues arising from future technological, social, economic and political developments and provides new age solutions. The concept of the campus includes an extensive library, an auditorium as well as meeting rooms and a banquet hall. Lindner developed various custom solutions for ceilings, floors and partition walls in close cooperation with the client and the architect. The value Lindner adds as a complete supplier in this system chain lies in the minimisation of interfaces throughout the value creation process.
