Project Description

BPW Italia raised a new building in the province of Verona, which now serves as the company's headquarters. The Italian subsidiary of BPW Bergische Achsen KG specialises in products for the towing vehicle industry for the Italian market. These include products for the areas of industrial vehicles, lightweight vehicles and for the agricultural sector.

Acoustically effective Lindner ceiling systems including recessed luminaries as well as partition and door systems were installed throughout the office building. Powder-coated Metal Heated and Chilled Ceilings of the type Plafotherm® B 100 now ensure a pleasant temperature in both summer and winter. Exhaust and Supply Air Elements have been integrated into the ceiling system for the supply of fresh air and its distribution in the room. The Deep Matt Powder Coating MOODline creates a subtle and at the same time elegant surface and is insensitive to streak of light. The rooms are airy and bright thanks to the use of the Glass Partition Lindner Life Pure 620 in single glazing. It is complemented by fully glass sound insulated doors for optimal acoustics. Lindner luminaires provide additional light.
