

Austria Campus

Vienna, Austria

© Manfred Seidl

Project Description

The Austria Campus in Vienna is one of the largest urban development projects in Europe. This business location comprises six office complexes with a plot area of 50,000 m² and an above-ground rental area of around 200,000 m². It has its own infrastructure including hotel, event centre, staff restaurants, medical centre, kindergarten and shopping facilities. Lindner installed extensive areas of plasterboard, chilled ceilings for the pleasant temperature control in the interiors and various floor systems.
