

Expansion Headquarters Pompadour, Bozen

Bolzano, Italy

Project Description

The Italian branch of the German Teekanne Group expanded its headquarters in Bolzano by adding additional office space. Particular importance was attached to a high-quality working environment where employees and customers feel comfortable: Soft lines structure the office zones, acoustically effective elements and striking colours round off the overall impression.

In the new office spaces, Lindner realised ceiling systems with integrated luminaires: In combination with the colour concept, the LED tracks zone the area boundaries – without the use of partition walls. The acoustically effective Lindner heated and chilled ceilings, in parts with deep matt powder coating, ensure a pleasant climate and a quiet working environment. The hollow floor system from Lindner accommodates installations and is free of harmful emissions.

Plafotherm® B 100
Heated and Chilled Plasterboard Ceilings
